HOW MANY TIMES have you sat poised over your desk, eager to knuckle down and concentrate, only to be distracted by your kids, a picture on the wall, an ambling fly in your viewpoint? Back-to-school your home and keep such distractions to a minimum by choosing a stylish cubicle. The Rewrite desk, with its cocoon-like dome, was originally created by designers GamFratesi for an exhibition at the Museum of Art and Design of Copenhagen; now it's in production for Ligne Roset. This intimate, lacquered sphere is fixed to a traditional wooden table (cables are hidden from sight in a metal box) offering you a space to work, to focus and to centre yourself with no interruptions. The portable upholstered screen also restricts light and sound, ensuring you can create a sanctuary even amidst a hub of activity. \$3,373; *Domicile* ■

HOT APP » Spanish porcelain purveyor Lladró has been creating classic Valencian figurines and inimitable items, such as the fanciful Parrot Party Collection, since 1953. Lladró's new virtual decoration app lets you browse pieces on your iPhone or iPad, move them around on your digital photos, share compositions on Facebook and then purchase the object of your desire at an online boutique. *Free; iTunes*
